# SOUND-BRIDGE Acoustic Labs

# **Model SB5115APT**

Full-Range Trapezoidal Speaker

5

The 5000 Series ... the ultimate speaker system.

The 5000 Series speakers were designed for the professional contractor or touring professional requiring high power, extremely accurate sound reinforcement. Only the finest components and materials are utilized in the manufacture of this series.

### Cabinetry

The cabinet design uses a 13 ply (18mm) high quality Baltic Birch® plywood with dado joints, recessed baffle and a 16 gauge front perforated grill for long lasting durability. Waterproof adhesive is utilized for lasting durability under the most adverse conditions. The baffle is 1.5" in thickness to enhance acoustical properties and to give the components a rigid interface. For lasting appearance the cabinet is finished with Polane-T® texture coating.

#### **Electrical Connections**

Two Neutrik Speakon connectors are installed on all speakers in the 5000 series. The 5115APT is biamp capable with a switch mounted on the jackplate to bypass the internal passive crossover, if needed.

#### **Transducers**

The 5115APT is loaded with a 15" co-axial driver yielding excellent power and phase coherency.
